| <i>Unfortunately, I have to live in [County] county. Which, after working in the ER realized that there is a overly high incidence of brain, cancer and multiple other cancers, which I believe are not only coming from contaminated food from our government, but the water in this area is highly contaminated. The water plant is right next to the Missouri river, downstream from [City] downstream From [City], which stinks like sewer, and on top of that you have farmers who have overly fertilize the ground and saturated it with chemicals years after years, which are killing people. I've been buying springwater for the last couple years and prior to that I was buying purified water because I was not knowledgeable about the fact that they strip all the vitamins from the purified water. Go figure the government does the bottled water and the purified water is always cheaper so people drink that which is not good for them. They should be drinking spring water and nobody in this area should be drinking water from a well or the faucet. I'm raising four young boys and I'll be damned if I'm gonna let this area kill them or make them sick prematurely because we're not doing anything about the contaminated water system. I should say the government is not doing anything about the contaminated water system just like the government is not stopping these big corporations for putting things in processed foods which make people, addicted, obesity, numerous types of different types of cancer, and DNA and blood cells within minutes of eating and drinking things.</i> |
| <i>Brain changes, poor detoxification, increase in chronic disease risk</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <i>I am not sure but interested since our home is on well water.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <i>I'm completely unaware of the health effects associated with nitrate contamination in drinking water</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <i>I am not sure, this hasn't been something that i have ever looked into.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
